OVERVIEW | SPECIFICATIONS

Description for Universal Multi-Pole Breaker Lockout

Brady's universal multi-pole breaker lockout is a single device that can be used with most major multi-pole breakers that employ a tie bar. This device is easy to use, and will give you the security you need to keep your energy source locked out.
It is made from durable glass-filled nylon with a stainless steel screw. This versatile device is compatible with most name-brand manufacturers, such as GE, ITE, Sylvania, Cutler-Hammer, Challenger, Bryant, Siemens, Square D and General Switch Company.
To use, just secure the clamp lockout over the tie bar by tightening the thumbscrew and insert padlock to prevent the clamp from being loosened.

Brady identifies and protects products, people, and premises with high performance labels, industrial label printers, software, safety & facility identification, spill control, Lockout Tagout solutions and more. Brady helps you create and maintain safer work environments and comply with regulatory standards. Our high-performance materials clearly identify products, components and other assets, even in the most extreme conditions.
