

Diamond Style Soldering Tip

Model: 44D

American Beauty Tools - Paragon Soldering Tip - Model 44D

Description

Any tradesman worth their salt will tell you, "If you want a job to turn out right, you've got to start with the right materials." We incorporate that philosophy into our soldering tips. Every American Beauty Paragon soldering tip starts with a solid core of Tellurium Copper. We know of no better alloy that combines the characteristics of high thermal conductivity with corrosion resistance required for effective soldering.

Subsequently, all tips then undergo a multitude of processes that include iron cladding, nickel plating, chrome coating and pre-tinning. Each process is conducted in a clean environment to prevent contamination and ensure proper material adherence. The end result is a soldering tip that provides optimal performance over a long life span.

Features and Benefits

All American Beauty Paragon Soldering Tips are **Lead Free** and **RoHS compliant** making them perfectly suitable for your greener environment.

Paragon Iron-Clad Lead-Free Soldering Iron Tips consistently outperform and outlast ordinary soldering iron tips many times over. **Plug-style tip design** provides for superior heat transfer and easy cleaning.

Technical Specifications

RoHS Compliant	Yes
Tip Configuration	Diamond
Tip Diameter	.625 in
Tip Length	4.68 in / 11.89 cm
Width of Working Area	.07 in / 0.18 cm
Thickness of Working Area	.075 in / 0.19 cm
Tapered Distance of Working Area	1 in / 2.54 cm
Understanding Tip Measurements	Explanation
Country of Origin	CR
Package Length	5.00 in / 12.70 cm
Package Width	1.00 in / 2.54 cm
Package Height	.75 in / 1.91 cm
Shipping Weight	.40 lbs / 0.18 kg
Warranty Policy	Details
