CeeLok FAS-T Nano Circular Connectors

10 Gb/s Ethernet Connectivity

CeeLok FAS-T Nano circular connectors give you 10 Gb/s Ethernet connectivity in a nanominiature circular connector—pushing the limits of high-speed I/O to new levels of compact convenience, durability, and environmental sealing.

The connectors use the same shells as our well-established environmentally sealed circular connectors, but with an enhanced insert to support high-speed signals. The 8-position connector's T-shaped contact pattern provides noise cancellation and decoupling to minimize crosstalk and increase signal integrity.

APPLICATIONS

HIGH SPEED

- Gigabit or 10 Gigabit rates for high-speed transmission of data, ideal for tight link budgets
- Factory terminated assemblies using 30 AWG TurboTwin cable
- T-shaped pin pattern improves signal integrity through uniform crosstalk cancellation

SPACE AND WEIGHT SAVINGS

- Nanominiature size enables high-speed connectivity in an extremely small space envelope
- Lightweight NANONICS housing available in push-pull or threaded coupling for a broad range of applications and uses

FLEXIBLE CONFIGURATIONS

- Choice of coupling styles:
 - Push-pull quick disconnect
 - Threaded
- Available in board-mount and cable-applied versions

RUGGED

- Withstands the harsh operating environment typical of aerospace, defense, and marine applications

- Military Weapons
- Ground Support Systems
- Soldier-Worn Applications

- Avionics
- Instrumentation
- Down-hole Telemetry Tools

Cable assemblies use Madison TurboTwin cable, a four-pair 30 AWG cable with a 100-ohm differential impedance. Standard length is 36". Consult TE for other lengths.

Board-mount connectors are terminated with 28 AWG solid copper wire, pre-soldered for ease of termination to the printed circuit board.

Superior Signal Integrity at Gigabit Rates

Superior Impedance Matching

CeeLok FAS-T Nano connectors are designed to maintain a highly matched 100-ohm impedance, with superior signal integrity.

More High-Frequency Headroom

The design and close impedance matching of the CeeLok FAS-T Nano connector gives you more performance margin to tolerate noisy environments that are sensitive to harmful interference.
