

SMB, SMC, SLIDE-ON SERIES

CRIMP, FLEXIBLE CABLE

Our crimp cable termination is designed for lowest cost to the user due to higher assembly production rates and low initial cost. The connector is not field serviceable, but the rear assembly can be replaced if the user desires. The cable braid is crimped to a removable barrel with a standard crimp tool. The barrel is assembled to the connector with a rear nut.

PLUG, STRAIGHT, CABLING PROCEDURE F
