Part No. 40-1072M Active HDMI Miniature Baluns, HDMI over 2 Cat5e/Cat6 Cables

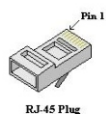

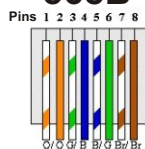

Calrad's small and innovative HDMI over UTP category 5e, 6 cable solution is specifically designed to deliver pristine digital signals from all HDTV formats and signal sources from 480P to 1080P. These devices are a perfect solution for replacing costly standard HDMI cables that are difficult to route thru walls and cabinets. Two Cat5e, Cat6 wires using RJ45 terminations deliver digital signals from the transmitter to the receiver and can feed plasmas, LCD and projection type displays. A small class 2 power supply may be required at the receiver side if power from the HDMI source is not sufficient.
