

# ARTESYN DS1200

1200 Watts

Distributed Power System

Advanced Energy's Artesyn DS1200 series is Artesyn Embedded Power's highest power, highest density bulk front end AC-DC power supply in the industry standard 1U x 2U form factor. It accepts a wide range 90 to 264 VAC input and provides a main 12 V output plus a 3.3 V or optional 5.5 V standby output. Rated at 1,100 watts, it has a high half-load efficiency of 91%. Housed in an industry standard 1U x 2U rack-mounting package, the power supply is designed for servers and similar space-constrained applications. This series comes in two airflow versions – dc-connector to ac-connector and vice versa.

## SPECIAL FEATURES

- Active power factor correction
- EN61000-3-2 harmonic compliance
- Active AC inrush control
- 1U X 2U form factor
- 21.71 W/in<sup>3</sup>
- +12 VDC Output
- +3.3 VDC or +5.0 VDC stand-by
- No minimum load required
- Hot plug operation
- N + 1 redundant
- Internal OR'ing fets
- Active current sharing (10 to 100% load)
- Built-in cooling fan (40 mm x 28 mm)
- I<sup>2</sup>C communication interface bus
- PMBus compliant

- EEPROM for FRU data
- Red/green bi-color LED status
- Internal fan speed control
- Fan fail tach output signal
- Full digital control
- Two years warranty

## SAFETY

- UL/cUL 62368 (UL Recognized)
- NEMKO+ CB Report EN62368
- EN62368
- CE Mark
- China CCC
- UKCA Mark

## AT A GLANCE

### Distributed Power Bulk Front-End

### Total Output Power

1200 Watts  
+3.3 VDC Standby Output

### Wide Range Input Voltage

90 to 264 VAC

## ELECTRICAL SPECIFICATIONS

| Input                 |                                                                                                                                                                   |

| Over voltage          | +12 V; 13.2 - 14.4 V<br>+3.3 V V <sub>SB</sub> ; 3.76 to 4.30 V                                                                                                   |
| Under voltage         | +12 V; 9 to 10.8 V (latch off)                                                                                                                                    |
| Turn-on delay         | 2 seconds max, 5 to 50 mS, monotonic rise                                                                                                                         |
| Main output rise time | 5 to 50 mS, monotonic rise                                                                                                                                        |

## LOGIC CONTROL

|                         |                                                                                                                                                                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PS_SEATED (A4)          | TTL logic LOW if power supply is seated into system connector. This is a short pin. A logic HIGH if the PSU is removed.                                                                                                              |
| PWR GOOD (C3)           | Active TTL high when output is within regulation limits.                                                                                                                                                                             |
| AC OK (B1)              | A low logic level if the input voltage is within allowable limits. A TTL logic HIGH level, and a 5mS early warning signal before 12.0 VDC output loss of regulation.                                                                 |
| PS_INHIBIT/PS_KILL (B4) | When left open power supply operation will be inhibited. When the power supply is inserted into the system, this pin will be pull low by the system and turn the power supply on only after all other power supply pins have seated. |
| PS ON (A1)              | The output will be enabled when this signal is pulled low, below 0.8 V outputs disabled when pin is driven high or left open.                                                                                                        |

## ENVIRONMENTAL SPECIFICATIONS

|                                                 |                                                                           |
|-------------------------------------------------|---------------------------------------------------------------------------|
| Operating temperature                           | -10°C to 50°C                                                             |
| Storage temperature                             | -40°C to +85°C                                                            |
| Altitude (operating)                            | 10,000 ft                                                                 |
| Electromagnetic susceptibility/Input transients | EN61000-3-2, -3-3<br>EN61000-4-2, -4-3, -4-4, -4-5, -4-11<br>EN55024:1998 |
| RoHS & lead-free compliant                      | No tantalum caps.                                                         |
| Humidity                                        | 20 to 90% RH, non-condensing                                              |
| Shock and vibration specifications              | Complies with standard operating/non-operating random shock and vibration |
| MTBF (Demonstrated)                             | 500K Hrs at full load, 25°C                                               |

## ORDERING INFORMATION

## ABOUT ADVANCED ENERGY

Advanced Energy (AE) has devoted more than three decades to perfecting power for its global customers. AE designs and manufactures highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

Our products enable customer innovation in complex applications for a wide range of industries including semiconductor equipment, industrial, manufacturing, telecommunications, data center computing, and medical. With deep applications know-how and responsive service and support across the globe, we build collaborative partnerships to meet rapid technological developments, propel growth for our customers, and innovate the future of power.

## PRECISION | POWER | PERFORMANCE
