CARBON ODOR FILTER

The Hakko 999-245 Carbon Odor Filter is designed as an optional filter that can be used in the Hakko FA-430 Fume Extraction System when the primary use of the system is to remove odors created by various processes. The pleated media contains highly activated carbon and provides a greater gas absorption area compared to the activated carbon portion of the standard main filter that comes with the Hakko FA-430 Fume Extraction System.

NOTE: This filter will also trap particulates, therefore, the use of the Hakko A1585 Pre-Filter is required to ensure maximum filter life.

Part Number: 999-245

*Absorption Capacity based on ASTM D3467 for Carbon Tetrachloride Activity of Activated Carbon.
