

WARD'S MARINE ELECTRIC

Ward's Marine Electric shorepower cable sets are made from only the best high quality material. These cord sets provide power with the accuracy and dependability Ward's is known for. With design features such as locking connections and pin/sleeve plugs, our cable sets are safe, reliable, and powerful. All WME cable is High Potential tested for insulation strength with a 5 milliamp default current setting.

WARD'S MARINE ELECTRIC

200 Amp

PARSYS-EXT-200 \$8,047.20

Paralleling Adaptor Dual 100A

This portable adaptor will permit the safe connection of your 200 ampere 120/240 VAC single phase shorepower cord to two compatible 100 ampere 120/240 VAC shorepower dock receptacles. A state of the art safety circuit protects from short circuits and shock hazards while easy to understand instructions ensure simple and straightforward operation.

If the two dock receptacles are supplied from the same utility power source [and can be safely interconnected] the adaptor will automatically check the phase relationship, correct phasing when needed, and make a safe parallel connection. In the case of incompatible power sources [where safe parallel connection is not possible] the adaptor will connect your 200 ampere shorepower cord to a single 100 ampere power source only, which will permit the operation of limited onboard loads.

100 Amp

PARSYS2-EXT-100 \$6,395.00

This portable adaptor will permit the safe connection of your 100 ampere 120/240 VAC single phase shorepower cord to two compatible 50 ampere 120/240 VAC shorepower dock receptacles. A state of the art safety circuit protects from short circuits and shock hazards while easy to understand instructions ensure simple and straightforward operation.

If the two dock receptacles are supplied from the same utility power source [and can be safely interconnected] the adaptor will automatically check the phase relationship, correct phasing when needed, and make a safe parallel connection. In the case of incompatible power sources [where safe parallel connection is not possible] the adaptor will connect your 100 ampere shorepower cord to a single 50 ampere power source only, which will permit the operation of limited onboard loads.

50 Amp

64CM100 \$2,251.70

This portable adaptor permits the safe connection of one or two 50 ampere 120/240 VAC shorepower cords to a single 100 ampere 120/240 VAC shorepower pedestal. Dedicated 50 ampere circuit breakers protect each of the 50 ampere shorepower systems separately. Ask our sales department about our special order unit that permits connection of your 50 ampere cords to a 100 ampere three phase power source, if certain safety conditions are met.

50 Amp

50/50RVS \$398.50
50A 220V Phase Rev Adaptor (SM Y)

30/50-250 \$365.00
30A Male to 50A Connector

This adaptor can be used in conjunction with the Charles Marine Products "Smart-Y" adaptor or any 50 ampere to 100 ampere paralleling adaptor that is not equipped with the automatic phase correction feature. The adaptor will reverse the phasing of the 50 ampere 120/240 VAC shorepower source. This adaptor is not necessary with the WME PARSYS2-EXT-100 and its unique automatic phase correction feature.

WARD'S MARINE ELECTRIC

BB208/230-100 \$3,410.00

BB208/230-50 \$1,750.00

These Portable Boost Transformers are safe, powerful, and can protect your 115/230 VAC equipment from many harmful low dock voltage conditions. Both the 100 ampere and 50 ampere versions are equipped with durable carrying handles and can be conveniently set next to your dockside power pedestal. When connected, a static 10% voltage boost is delivered to provide safer and more effective power to your boat. There are no manual overrides on these units, so the voltage will be boosted 10% regardless of input voltage. Not suitable for marinas where erratic voltage fluctuations occur.

FEATURES

- Non-adjustable
- 10% Boost
- ABYC Compliant
- Portable
- Durable
- Useful for 115/230 VAC Shorepower Systems
- Suitable for 200-220 volt dock power sources

Adapter Selection Guide

IMPROVED
DESIGN

YQ230

Permits use of one 50 Amp 125/250 Volt cord set with two 30 Amp 125 Volt dockside receptacles that are on separate circuits.

NEW

YQ100PLUS Now two adapters in one

Permits use of one 100 Amp 125/250 Volt cord set with two 50 Amp 125/250 Volt dockside receptacles that are on the same circuit; or with a single 50 Amp 125/250 Volt outlet, if only one such receptacle is available.

What separates Hubbell's shore power cable sets and adapters from the rest?

UL Listed. (Cable sets only.)

Available in 25, 35 and 50 foot lengths.

Jute fillers inside jacket for maximum cable flexibility. Hubbell cable coils neater, lighter, lays flatter.

Molded flexneck adds life to cable set by helping to prevent right-angle cable damage and pullout.

Strain relief bull ring protects against stress and strain on the conductors caused by boat movement, crew traffic and rough handling.

Molded design totally encased in solid PVC material, for superior waterproofing and durability.

Exclusive copper crimp barrel termination provides protection against internal overheating and burnout compared to brass crimps. These copper crimps are the same type used by power companies. The result: tighter connections, better conductivity and longer life.

Locking ring assures proper alignment of connector to inlet for complete contact and waterproofing. Prevents accidental disengagement.
