

Front - Loading Media Holders

Store CDs, DVD's, VHS tapes, cassettes, laser discs and other recorded media in our rackmount media holders. Partitioned to prevent the contents from tipping, each model features a 16 gauge flanged aluminum face and a choice of a silver brushed and anodized, black brushed and anodized or textured black powder coat finish. All stored media protrudes 3/8" to allow quick retrieval.

See the chart below for capacities and more info.
