

Rack Ganging/Bonding Kit, 24 pc.

BOND-G24

• Eliminate bonding wires run between racks, while providing lowest impedance ground possible • Self-piercing at bonding points – no need to remove paint • Displaces paint without compromising the corrosion protection of the painted surface, eliminating the need for anti-oxidizing protection products required by other bonding methods • Handy installation tool provides ease of installation & proper torque

Features

Key Specifications

Requires

Features

- Eliminates need for bonding straps between racks
- Provides low impedance ground
- Self-piercing design – no need to remove paint
- Displaces coating – no anti-oxidant protection required
- Includes handy installation tool
- Includes 24 sets of hardware

Key Specifications

General Info

quantity: 24

Listing Agencies/Third Party Information
