Note:EE-1009- or EE-1010-series Connectors have a builtin locking mechanism to prevent cable disconnection when only the cable is pulled. To remove the Connector from the Sensor, grip the top and bottom of the Connector firmly and push into the Sensor once before pulling out. The locking mechanism prevents the Connector from being removed by pulling on the cable only and enables removal only when the Connector (housing) is pulled.

Note:The case (housing) and dispersion pins (for hand-crimping) for EE-1006 Connector can be ordered separately. Use the EE-1006T Special Crimping Tool to prepare the Connector.
