

Foam Arrow Tip Swab

2309

Precisely designed, manufactured and packaged to serve a wide variety of cleaning and maintenance needs. TechSwabs are manufactured in accordance with Techspray's rigid specifications, using specialized materials to ensure low particle generation. Cotton swabs are the most economical choice for high volume usage. Foam swabs are ideal for more precision cleaning where linting needs to be avoided.

High-precision flexible pointed foam head

All foam swabs are manufactured with 100 pores per inch reticulated polyurethane foam, which ensures excellent absorbency while minimizing contamination. Tips are affixed by heat seal to prevent tip loss, even while saturated with solvent. Flexible tips provide versatility and softer touch, while rigid heads allow for more aggressive cleaning. 2309 swab has a high precision arrow tip, for fine cleaning and coating / adhesive application. The tip is flexible for a softer touch.

- Reticulated polyurethane foam
- Head thermally bonded
- High absorbency
- Low particulate count
- Flexible tip for softer touch
