

## Isobar 12-Outlet Network Server Surge Protector, 15 ft. Cord, 3840 Joules, Diagnostic LEDs, 1U Rack-Mount, Metal Housing

MODEL NUMBER: **IBAR12**

Rack-mount protection for A/V components, network hardware, retail displays, appliances, power tools and other expensive electronics against dangerous surges, spikes and line noise in IT and industrial environments.

### Description

Premium protection for essential network workstations, telecom systems, point-of-sale equipment and audio/video systems, the IBAR12 Isobar® 12-Outlet Surge Protector features a network-grade surge protection rating of 3840 joules to defend your sensitive electronics against even the strongest surges and spikes. In fact, Tripp Lite will repair or replace any connected equipment damaged by surges, including direct lightning strikes, up to \$25,000 for life (valid in the U.S., Canada and Puerto Rico only).

The IBAR12 features 12 total outlets—two on the front and 10 on the rear—which are arranged in two exclusive isolated filter banks that prevent equipment connected to one bank from interfering with equipment connected to the other. These internal barriers also prevent disruptive line noise from causing A/V distortion, computer lock-ups, data errors and similar problems. Large toroidal chokes, ferrite rod-core inductors, HF/VHF capacitors and multiple layers of metal oxide varistors remove EMI/RFI interference and prevent system crashes, reboots and performance problems.

Because residential power outlets have three wires—hot line (H), neutral (N) and ground (G)—the IBAR12 protects all three, covering two protection modes: full normal mode (H-N) and common mode (N-G/H-G).

An integrated 15A circuit breaker protects all outlets and shuts down connected equipment in the event of an overload. A lighted on/off switch with locking cover provides one-touch control over connected components. Diagnostic LEDs show power, protection and line fault status at a glance. The IBAR12 mounts to a wall, under a counter or in 1U of rack space using the included hardware. A 15-foot power cord with NEMA 5-15P plug reaches distant outlets.

### Highlights

- 12 NEMA 5-15R outlets in exclusive isolated filter banks
- Network-grade 3840-joule surge protection rating
- Mounts into 1U of space in EIA-standard 19 in. racks
- 15A resettable circuit breaker prevents dangerous overloads
- 15 ft. AC power cord with NEMA 5-15P plug

### Package Includes

- IBAR12 Isobar 12-Outlet Surge Protector, 1U Rack-Mount
- Rack-mounting brackets
- Owner's manual

## Features

### Network-Grade 3840-Joule Surge Protection for IT or Industrial Electronics

- Protects rack-mounted network hardware, retail displays, appliances, power tools and other expensive electronics against even the strongest surges and spikes
- Recommended for network workstations, telecom systems, point-of-sale equipment and audio/video systems requiring AC line protection
- Full normal mode (H-N) and common mode (N-G/H-G) line surge suppression
- Filters out disruptive EMI/RFI line noise that can cause equipment damage or data loss
- Exceeds IEEE 587 Category A and B surge suppression specifications

### 12 Outlets Accept Wide Range of Electronic Devices

- 12 NEMA 5-15R AC outlets accept most computer, networking and telecom equipment

### Isolated Filter Banks Provide Extra Protection

- Outlets arranged in 2 exclusive isolated filter banks to limit noise interaction among connected equipment
- Block disruptive EMI/RFI line noise that can cause equipment damage or data loss
- Black outlets provide basic protection for less sensitive equipment
- White outlets provide highest level of protection (up to 80 dB) for more sensitive equipment

### Premium Safety Features

- Lighted on/off switch with locking cover provides one-touch control over connected equipment
- Diagnostic LEDs confirm power, protection and line fault status at a glance
- Conforms to current UL 1449 3rd Edition safety standards

### Flexible Mounting Options

- Mounts into 1U of space in EIA-standard 19 in. racks
- Included mounting hardware also allows installation on wall or under counter
- Long 15 ft. AC power cord with NEMA 5-15P plug reaches distant outlets
- All-metal housing designed for long life

### Backed by Tripp Lite's Ultimate Lifetime Insurance

- \$25,000 Ultimate Lifetime Insurance covers any connected components damaged by power surge (U.S., Canada and Puerto Rico only)

| Frequency Compatibility             | 50 / 60 Hz                                                                                    |
| Output (Watts)                      | 1800                                                                                          |
| Output Receptacles                  | (12) 5-15R                                                                                    |
| Circuit Breaker (amps)              | 15                                                                                            |
| Right-Angle Outlets                 | No                                                                                            |
| INPUT                               |                                                                                               |
| Nominal Input Voltage(s) Supported  | 120V AC                                                                                       |
| Recommended Electrical Service      | 120V (110-125V)                                                                               |
| Voltage Compatibility (VAC)         | 120                                                                                           |
| Maximum Surge Amps                  | 150000                                                                                        |
| Input Plug Type                     | NEMA 5-15P                                                                                    |
| Input Cord Length (ft.)             | 15                                                                                            |
| Right-Angle Plug                    | No                                                                                            |
| Input Cord Length (m)               | 4.57                                                                                          |
| Integrated Cord Clip                | No                                                                                            |
| USER INTERFACE, ALERTS & CONTROLS   |                                                                                               |
| Diagnostic LED(s)                   | Yes                                                                                           |
| Switches                            | Red illuminated power switch controls power to all outlets                                    |
| Locking Switch Cover                | Transparent locking switch cover prevents accidental shutoff                                  |
| SURGE / NOISE SUPPRESSION           |                                                                                               |
| AC Suppression Joule Rating         | 3840                                                                                          |
| AC Suppression Response Time        | NM = 0 ns. CM = <1 ns                                                                         |
| Protection Modes                    | Includes full normal mode (H-N) and common mode (N-G / H-G) line surge suppression            |
| Clamping Voltage (RMS)              | 140                                                                                           |
| AC Suppression Surge Current Rating | 60,000 amps                                                                                   |
| AC Suppression Components Used      | Metal oxide varistors, toroidal balanced chokes and VHF capacitors                            |
| Safe Thermal Fusing                 | Prevents unsafe conditions during extreme extended over-voltages and catastrophic occurrences |
| UL1449 Let Through Rating           | 330V                                                                                          |
| EMI / RFI Filtering                 | 40-80 dB                                                                                      |
| Isolated Filter Banks               | 2                                                                                             |
| Immunity                            | Conforms to IEE 587 / ANSI C62.41                                                             |
