The DMC markers can be used for labelling switching devices or sub-assemblies. The large (12 x 27 mm) marking surface offers sufficient room for information describing the device and its function. Only one tag size for cable cross-sections from 0.5 – 10 mm<sup>2</sup> enables use on both multi-core control cables and single cores.

**For custom printing:** Please send us a file of our labeling software M-Print PRO or M-Print PRO Online (without installation) for your labeling specifications.

Please note that these markers are not intended for printing with the SpeedMarking laser.
